

Designed by brokers, for brokers...

WannaSoft manages the entire policy lifecycle in the contact centre and on the internet

Introducing...
“Zero Touch”
software – the industry’s latest technology

WannaSoft automates the policy lifecycle of risks that usually cost more to handle than they earn in commission

Customers can buy, modify and renew their policy entirely online

Real Time Intelligent Pricing for an ultra-competitive edge

Workflow wizards minimize dependence on contact centres

Wanna Insure’s unique product – WannaSoft – cuts the cost of broking and enables unprecedented business flexibility.

What WannaSoft will mean to your business...

- **Increased New Business Volumes**
Reach out to clients with 24x7x365 access to full ‘quote and buy’ with all policy documentation and certificates delivered securely by email.
- **Reduced Staff Overheads**
Self-Service on the Internet is a key feature of WannaSoft and lets your clients buy, amend and renew their own policies, so your own staff levels can be minimal.
- **Improved Renewal Retention**
Configure your system to automatically email your clients at renewal with a link to your website where they simply login, check the details and pay instantly online.
- **Low Cost of Change**
Wannasoft is based on the latest Microsoft™ .Net technologies so most existing hardware is re-useable. Staff re-training can be staggered with minimal disruption to existing operations.
- **Scalability**
The technical platform for WannaSoft has been designed for brokers with one to unlimited user numbers.
- **Flexible Pricing**
Live access to scheme performance in your target markets, and the ability to make immediate changes.
